

MMA and TIG inverter, electrode welding machine in direct current (DC) with scratch striking. Use with a wide range of electrodes: rutile, basic, stainless steel, cast iron, etc. The model can be connected to motogenerators. Characteristics: high welding current stability in spite of mains voltage fluctuations * arc force, hot start and anti-stick devices * thermostatic, overvoltage, undervoltage, overcurrent protections * multiprotections for motogenerators * input power limiting device. Complete with MMA welding accessories and plastic carry case.
